Subject: RE: Dairy Dreams Manure Spill

Follow Up Flag: Follow up
Flag Status: Flagged

All,

I just wanted to provide a brief update on the manure spill reported by Dairy Dreams earlier today. The spill was discovered early this morning and vac trucks were on site by 8 am. Manure was contained to a grassed waterway within a cropped field just south of the farm (see aerial below) and collection efforts were ongoing upon my arrival at approximately 11:30 a.m. Manure was not observed to have reached waters of the state and both stream crossings at Finch Road were clear during my time on site. The source of the spill had been stopped and the farm was working on removing ice, vegetation and residual manure from the grassed waterway with a backhoe at the time of my departure. I will be visiting the site once cleanup actions are complete to confirm that all residual manure has been removed from this waterway.

Feel free to let me know if you have any questions.

Thank you,
Andrea

Subject: Dairy Dreams Manure Spill

All,

I just received notification from Todd Koss that Dairy Dreams had a manure spill from one of their barns overnight. The manure exited the barns to the south into field M4. Todd explained that there is a waterway in M4, but that the manure is currently contained and they are working with Debroux to collect. I will be heading out there shortly and they are calling it into the Spills Hotline.

Feel free to call my cell phone at (920) 367-3007 if you need to reach me.
